

Berechne die Brüche:

$\frac{3}{8} + \frac{1}{8} =$	$\frac{1}{12} + \frac{3}{12} =$	$\frac{1}{16} + \frac{3}{16} + \frac{5}{16} =$
$\frac{3}{8} - \frac{1}{8} =$	$\frac{11}{60} + \frac{4}{60} =$	$\frac{2}{3} + \frac{3}{3} + \frac{4}{3} =$
$\frac{7}{8} - \frac{1}{8} =$	$\frac{7}{8} + \frac{6}{8} =$	$\frac{11}{16} + \frac{1}{16} - \frac{8}{16} =$
$\frac{3}{8} + \frac{1}{8} =$	$\frac{1}{12} + \frac{3}{12} =$	$\frac{1}{16} + \frac{3}{16} + \frac{5}{16} =$
$\frac{3}{10} + \frac{7}{10} =$	$\frac{7}{10} - \frac{3}{10} =$	$\frac{1}{100} + \frac{9}{100} =$
$\frac{24}{16} - \frac{8}{16} =$	$\frac{8}{14} - \frac{1}{14} =$	$\frac{1}{18} + \frac{8}{18} - \frac{2}{18} =$

Schreibe diese Brüche als gemischte Zahlen:

$\frac{17}{8} =$	$\frac{23}{12} =$	$\frac{33}{4} =$
$\frac{9}{2} =$	$\frac{19}{18} =$	$\frac{17}{3} =$
$\frac{23}{10} =$	$\frac{37}{9} =$	$\frac{314}{100} =$

Schreibe diese gemischten Zahlen als Brüche:

$1\frac{1}{4} =$	$2\frac{3}{8} =$	$3\frac{3}{4} =$
$1\frac{1}{10} =$	$3\frac{14}{100} =$	$4\frac{2}{5} =$
$5\frac{5}{10} =$	$10\frac{1}{8} =$	$56\frac{7}{10} =$
